**THE BEST STANCE
ON THE TEE-BOX**

Kraft Paper Packaging

Reusable

Resealable

Recyclable

1. Bamboo is strong, sustainable, durable and biodegradable which is positive both environmentally and for your game.
2. They' re ridiculously more durable than wooden tees with a lot less snapping so we' re preserving your pocket.
3. They' re eco-friendly too, unlike plastic, so we' re preserving the planet!
4. Plastic tees can take up to 450 years to decompose and even their manufacture is harmful.
5. Bamboos natural growth rate, an impressive 100 – 900mm per day, gives it an unprecedented sustainability count. Clearly better than the cedar often used for wooden tees.
6. Importantly, bamboo needs no pesticides to cultivate and little water compared to trees.
7. Packaged in recyclable Kraft paper with a resealable, reusable zip we' ve taken a stance on single-use plastic. We' re seeking to eradicate it.
